# **For Second Year, BASELINE ENGINEERING Recognized on the FASTEST GROWING PRIVATE COMPANIES List**

**Golden, Colo.** (Aug 7, 2007) – Baseline Engineering, a leading Civil Engineering firm in the Inter-Mountain West, has been ranked by the *Denver Business Journal* on the “2007 Fastest Growing Small Private Companies” list. The list ranks private companies in the Denver area based on percentage of revenue growth from 2004-2006. Baseline Engineering saw an increase in revenue during that period of 207%.

The *Denver Business Journal* called small private companies those with revenues less than \$3.3 million in gross revenue. Baseline Engineering is again the lone engineering company on this year's fastest growing list. CH2M Hill, an engineering company based in Englewood, Colorado, once again topped the Private Company (Ranked by Revenue) list by earning \$4.5 billion in revenue for 2006. Baseline Engineering finished 371 on the Ranked by Revenue List.

Also, *The Zweig Letter 2007* Hot Firm List has Baseline Engineering as a “contender to be among the 200 fastest-growing architecture, engineering, and environmental firms in the United States and Canada.” The top 200 firms will be announced at The Zweig Letter 2007 Hot Firm Conference, October 24-26 in Boston.

U.S. Senator Ken Salazar (D-CO) commended the accomplishment, “Colorado is very fortunate to have Baseline Engineering contribute economically to our state.”

**About Baseline Engineering Corp.:** Headquartered in Golden, Colorado, Baseline Engineering is a regional leader in Civil Engineering for private and public clients. The firm’s work is concentrated in traditional civil engineering and land development services, design of water and wastewater treatment facilities, energy industry permitting, pipeline services, and land surveying.
